

Pegsies™ “Make Your Own” Information Sheet

Designing and coloring your very own Pegsies™ character is a fun, creative, and rewarding experience. Who will your character be? What is their name? What are they doing? What colors will they be wearing? What facial expression will they show? This sheet is prepared to help you get started. But you are not limited to what you see on this sheet. Let your imagination run wild! Before you begin your designs and coloring, make sure you have permission from an adult.

We'd love to see your finished masterpiece! Please share with us.

Materials

- Make your own Pegsies™ blank wooden character
- Make your own Pegsies™ drawing sheet
 - Additional drawing sheets can be downloaded for free on Pegsies.com
- Pencil (for drawing your ideas)
- Colors (we've had good results with the below materials on the wooden character)
 - Markers
 - Water Colors
 - Acrylic Paints
 - Crayons
 - Pens
- Mod Podge® [optional] - to help protect your character during playtime
- Hot Glue [optional] - to glue on hats or other accessories

Tips and Tricks

- Draw and color many ideas before coloring on the wooden character (if you need additional drawing sheets, they can be downloaded for free on Pegsies.com).
- Details are sometimes difficult to draw on a wooden character, try to start simple.
- If you want small details, try using a pen or small brush.
- Draw your design on the wooden character with a pencil first. You can erase mistakes and then color in the lines once you are ready!
- Colors sometimes take a little bit to dry on the wooden character. Try not to smear your hard work.
- Take your time, let a coat of paint/color dry before going over it.
- Use Mod Podge® to cover your wooden character after done coloring. It will help protect it during play.
- Many different materials can be used in addition to colors. Maybe use yarn for hair. Or try felt for clothing or other accessories. Hot glue is a great way to have your materials stick to your character.
- Make sure you clean up your workspace when done. Don't let your paints or markers dry out so you have them for your next design!
